Christine Cotton OFFICIEL
@StatChrisCotton

Friends, I'm sharing with you the latest version of my report on Pfizer's clinical trials for its COVID vaccine.
This document has been used in complaints against French health authorities, a legal action for abuse of power against the ANSM (French National Agency for Medicines and Health Products Safety), and a criminal complaint for aggravated deception and administering a substance without consent.
This report demonstrates that the population has not received the product tested into the clinical trial with the 95% efficacy so touted by politicians, journalists, and TV doctors, and that, at the time it was authorized, there were no results on efficacy and satefty.
It highlights incomplete results, multiple risks and missing information, as well as numerous methodological problems and even fraud that invalidate all the results.

If you don't have the courage to read it in its entirety, at least read the conclusion, which is unequivocal. This product is the biggest scandal in the history of the pharmaceutical industry: lies, mass manipulation, refusal to acknowledge the victims...
In the future, be vigilant.
